## Date and location announced for Horizon's May Open Surgery

---

Horizon Nuclear Power will hold its next monthly Open Surgery on Monday 20 May at Cemaes Village Hall. The event, which will take place between 1pm and 7pm, enables local people to call in and ask questions about plans for a new nuclear power station at Wylfa – no appointment is necessary.

Horizon's plans to construct and operate a new nuclear power station at Wylfa will create a peak workforce of up to 6,000 during construction and around 1,000 permanent jobs over many decades.

Alan Smith, Head of Site Development at Horizon Nuclear Power, said: "These monthly events are a great way for us to listen to feedback and answer questions. For those who can't drop-in to meet us in person, we've also recently updated our website - [www.horizonnuclearpower.com](http://www.horizonnuclearpower.com) - which enables local people to find out key facts about our project at the click of a mouse."

"It's still early days since our acquisition by Hitachi at the end of last year and we're continuing to assess the options for our resumed development plan at Wylfa and the likely timescales involved in delivering the project. We'll share more detail about our proposals in the months ahead as our proposals develop, but in the meantime we'd encourage anyone with any questions about our work to drop-in to this event or contact us via our Freephone hotline on 0800 954 9516 or email us at [wylfaenquiries@horizonnuclearpower.com](mailto:wylfaenquiries@horizonnuclearpower.com)."

**Notes to editors:**

- Horizon Nuclear Power was formed in 2009 as a 50:50 joint venture between E.ON UK and RWE npower.
- E.ON UK and RWE npower reached agreement on 30 October 2012 for the sale of Horizon to Hitachi Limited. The sale completed on 23 November 2012.

- Horizon holds grid connection agreements and owns land suitable for the development of new nuclear power stations at Wylfa on the Isle of Anglesey and Oldbury-on-Severn in South Gloucestershire. Both sites are nominated for nuclear development under the National Policy Statement for Nuclear (EN-6).
