Horizon announces date and location for its December Open Surgery

Horizon Nuclear Power's final Open Surgery of 2013 will take place on Monday 16 December at the Village Hall, Cemaes.

Part of Horizon's regular community engagement programme, local people can call in to the event at any time between 1pm and 7pm to discuss Horizon's Wylfa Newydd project.

Speaking about the event, Alan Smith, from Horizon, said: "As always, our site development team will be on hand to chat to and listen to feedback people have regarding Wylfa Newydd. We always enjoy a good turnout at our Cemaes surgeries, so we hope this event will prove as popular as ever. If anyone has any questions, particularly following the recent progress announcements for the project, I'd encourage them to pop in and meet the team."

Horizon's Wylfa Newydd nuclear power station will create around 1,000 permanent jobs over many decades to operate the plant and will require a peak workforce of up to 6,000 during the construction phase. There will also be significant opportunities for local businesses to play a part in the project.

More information about Horizon's plans and current job vacancies can be found on its website - www.horizonnuclearpower.com - while its project team can be contacted via a Freephone hotline on 0800 954 9516 or by email at wylfaenquiries@horizonnuclearpower.com.

Notes to editors:

- Horizon Nuclear Power was formed in 2009 to develop new nuclear power stations in the UK. The company was acquired by Hitachi Ltd of Japan in November 2012 from previous joint owners RWE npower and E.ON UK.
- Hitachi-GE Nuclear Energy, Ltd., (Hitachi-GE) is the technology provider and 'delivery team' leader for Horizon's developments at Wylfa on the Isle of Anglesey and Oldbury-on-Severn in South Gloucestershire. Hitachi-GE is owned 80.01% by Hitachi Ltd and 19.99% by GE.
- Horizon's developments at Wylfa and Oldbury will represent multibillion pound investments in the UK's infrastructure. Each is expected to create up to 1000 jobs during operation, and around 6000 during the peak construction phase.
