## Horizon Nuclear Power to expand into new headquarters

---

**Nuclear power company Horizon has announced it will be moving to new, custom-built premises at Gloucester Business Park.**

The firm is creating hundreds of new jobs at its headquarters as it boosts its team to around 400 people, to be followed by thousands in the construction and operation of nuclear power stations in North Wales, and later, in Gloucestershire.

The company, formed in 2009, is behind the development of nuclear power stations at Wylfa on Anglesey and near Oldbury-on-Severn in South Gloucestershire. Horizon will eventually employ up to a thousand people at each of its power station sites once operational, with a peak construction workforce of up to 6000.

Horizon currently employs 150 people but is rapidly recruiting at a rate of around 100 people per year as its projects gather momentum. The new headquarters will be available from 2016.

Alan Raymant, Chief Operating Officer of Horizon Nuclear Power, said: "Horizon is growing quickly. Our activity continues to ramp up and we're developing an organisation capable of delivering large-scale, complex, infrastructure projects.

"These first-class headquarters demonstrate the commitment of Hitachi and Horizon to establishing the resources and infrastructure needed to support this exciting multi-billion pound programme."

This is the latest in a series of significant developments for the company. In December, Horizon signed a co-operation agreement with the Treasury, designed to support project financing, and a series of "framework contracts" with major UK based engineering companies. In January, the "UK Advanced Boiling Water Reactor" technology proposed for both sites moved to the second of four stages in the Government's "Generic Design Assessment" regulatory process for new nuclear reactors in the UK.

#### Notes to editors

- Horizon Nuclear Power was formed in 2009 to develop new nuclear power stations in the UK. It was acquired by Hitachi Ltd of Japan in November 2012. The company is developing plans to build at least 5,400MW of new nuclear power generation plant at Wylfa on the Isle of Anglesey and Oldbury-on-Severn in South Gloucestershire.
- Horizon's developments will represent multibillion pound investments in Anglesey and South Gloucestershire. It is expected to create up to 1000 jobs during operation, and up to 6000 during the peak construction phase.
- Gloucester Business Park is owned, developed and managed by Goodman. Goodman Group is an integrated property group with operations throughout Australia, New Zealand, Asia, Europe, the United Kingdom, North America and Brazil. Goodman Group, comprised of the stapled entities Goodman Limited and Goodman Industrial Trust, is the largest industrial property group listed on the Australian Securities Exchange and one of the largest listed specialist fund managers of industrial property and business space globally. Goodman's global property expertise, integrated own+develop+manage customer service offering and significant fund management platform ensures it creates innovative property solutions that meet the individual requirements of its customers, whilst seeking to deliver attractive long-term returns for investors. In Europe, Goodman has offices in the UK, Germany, the Netherlands, Belgium, Luxembourg, France, Spain, Italy, Poland, Czech Republic, Hungary and Slovakia.
