Horizon confirms Open Surgery details for January

Horizon Nuclear Power's first Open Surgery of 2014 will take place on Monday 20 January at the Village Hall, Cemaes.

With no prior appointment required, these regular community engagement events give local people the opportunity to call in any time between 1pm and 7pm to discuss Horizon's Wylfa Newydd project.

Speaking about the event, Alan Smith from Horizon said: "2014 will be a very busy and exciting time for us and we're looking forward to undertaking our first stage of formal public consultation later in the year. In the meantime, we'll continue our programme of Open Surgeries, where our site development team will be on hand to chat to people about Wylfa Newydd, and listen to their feedback. If anyone has any questions, I'd encourage them to pop in and meet the team."

Horizon's Wylfa Newydd nuclear power station will create around 1,000 permanent jobs over the many decades that the plant will be in operation and will require a peak workforce of around 6,000 during the construction phase. There will also be significant opportunities for local businesses to play a part in the project.

More information about Horizon's plans and current job vacancies can be found on its website - www.horizonnuclearpower.com - while its project team can be contacted via a Freephone hotline on 0800 954 9516 or by email at wylfaenquiries@horizonnuclearpower.com.

Notes to editors:

- Horizon Nuclear Power was formed in 2009 to develop new nuclear power stations in the UK. The company was acquired by Hitachi Ltd of Japan in November 2012 from previous joint owners RWE npower and E.ON UK.
- Hitachi-GE Nuclear Energy, Ltd., (Hitachi-GE) is the technology provider and 'delivery team' leader for Horizon's developments at Wylfa on the Isle of Anglesey and Oldbury-on-Severn in South Gloucestershire. Hitachi-GE is owned 80.01% by Hitachi Ltd and 19.99% by GE.
- Horizon's developments at Wylfa and Oldbury will represent multibillion pound investments in the UK's infrastructure. Each is expected to create up to 1000 jobs during operation, and around 6000 during the peak construction phase.
