

## Date and location announced for Wylfa Open Surgery in August

**Horizon will hold its next Open Surgery at Llangefni's Communities First Centre on Monday 20 August, at which local people can ask questions about plans for a new nuclear power station at Wylfa.**

As with previous events, the August Open Surgery will give people the opportunity to meet Horizon's project team and find out more about its work.

The surgery will take place between 1pm and 7pm on 20 August at the Llangefni Communities First Centre. No appointment is necessary.

Alan Smith, Head of Site Development at Horizon Nuclear Power, said: "Our local work is very much continuing while our shareholders seek new owners for Horizon and this includes monthly events to meet our team. If you have any questions about the project, or just want to know more about our current activities, please come along and we'll be happy to talk to you."

Anybody who has questions about the project can also contact the Wylfa team by calling its hotline on 0800 954 9516 or by emailing [wylfaenquiries@horizonnuclearpower.com](mailto:wylfaenquiries@horizonnuclearpower.com)

**Notes to editors**

Horizon Nuclear Power was formed in January 2009 with the aim of developing up to 6,600 MW of new nuclear power station capacity to help meet the UK's need for stable and

sustainable low carbon energy.

Following the conclusion of separate strategic reviews in March 2012, the company's shareholders – E.ON UK and RWE npower – have announced their intention to withdraw from UK nuclear and seek new owners for Horizon.

Horizon continues to build on the progress made in developing its site at Wylfa as it prepare the business for new owners

A new nuclear power station at Wylfa would deliver enough low carbon electricity for more than 5 million households. It is expected that around 5000 people would be employed during construction and around 800 permanent jobs would be created during operation.
