### Horizon Nuclear Power statement on Weightman Interim Report

**Please see below a statement from Horizon Nuclear Power, following today's interim report on lessons learned from Fukushima by Dr Mike Weightman**

We welcome the publication of the interim report from Dr Weightman, and its recognition of the strong safety culture in the UK nuclear industry.

We are looking at the report in detail now and we remain committed to putting safety first, and ensuring our proposals for new nuclear power stations at Wylfa and Oldbury reflect any lessons learned from the events in Japan and the Chief Inspector's final report in September.
